May 2018

Dear Parent or Guardian,

This has been an exciting year for the science research program. The research opportunities for our students will continue with the Cold Spring Harbor High School Summer Research Program. This program is intended for students entering grades 9 to 12. The Summer Research Program is designed for:

- 1) Students who have completed Advanced Science Research I or Research I and II. The Summer Research Program is an opportunity to continue their research or to get a head start on their Advanced Science Research II or Independent Research project.
- 2) Students planning to take Advanced Science Research I or Research I and II. The Summer Research Program is an opportunity to learn laboratory skills and conduct supervised experiments using the latest techniques in molecular and genomic biology.

Although summer research is not a requirement, attendance is strongly encouraged in order for students to enhance their research experience and get the most out of our research program.

Students who attend a minimum of 60 hours will earn 0.5 credits.

Dates: July 9, 2018 to August 16, 2018  
Days: Monday to Thursday  
Times: 8:00 am to 12:00 noon  
Location: Cold Spring Harbor High School, Rooms S-10, S-10.5 and S-11

Please complete the [google form](#) indicating your child's interest in this program by June 11<sup>th</sup>. Please note that based upon student responses, we may need to assign students to specific weeks in order to ensure everyone has the opportunity to participate in our Summer Research Program.
