

Goosehill Primary School

Weekly Notes- June 9, 2017

Dear Parents,

Next Friday (June 16th at 9:30) I will present a workshop for parents on ways to encourage and support reading over the summer. **Here are just a few of the ideas we will discuss:**

- ✦ The best predictor of summer loss or summer gain is whether or not a child reads during the summer. Just 15 minutes a day can make a huge difference for a young reader.
- ✦ Children don't just need books...*they need the right books*— books that match their skill levels and their interests. High-success reading is essential. If a child struggles to read a book, it won't be fun. If reading isn't fun, a child will do everything s/he can to avoid it! Find books that are "comfortable" for your child, where s/he has to stop to decode only a few words in the whole book. Let him/her choose books and magazines that interest him/her. Joke and riddle books are great options for reluctant readers. They provide immediate gratification—*they make people laugh!* Children are more likely to become lifelong readers when reading is pleasurable. Find what your child likes and build from there.
- ✦ Visit the public library – often. Your library can often serve as the best resource to keep your child reading over the summer. One of the Cold Spring Harbor Librarians will visit our classes on Thursday to tell the students about the Library's Summer Reading Club. Check your child's HW folder for the flyer describing the program and inviting them to the Kick-Off event.
- ✦ Explore online reading sites/apps for young readers. For example, www.storylineonline.net is a fabulous (and free!) site featuring actors who read children's picture books aloud. (It is sponsored by the Screen Actors Guild.) Your child can also continue to use Raz-Kids at home. Try other sites, such as Starfall.com or Reading Rainbow (www.readingrainbow.com) which also has iPad apps for a small fee.
- ✦ Most importantly, read aloud to your child regularly. Reading aloud to your child builds comprehension, vocabulary, and a love of reading. It is the single most effective way to promote your child's success in school. At the workshop, I will present specific strategies that will help you strengthen your child's reading ability by reading aloud in an intentional way.

Have a wonderful weekend!

Warm regards,

Mrs. Herschlein

Science Enhancement Opportunities

Summer Science Programs

NASA - SPACE EXPLORERS (NASA)

Learn about the four forces of flight, the challenges of space travel, and participate in a rocket launch in this hands-on space exploration camp. (Children entering grades 3-6)

FLIGHT ACADEMY (FA)

Explore the aerodynamics of birds, kites and rockets! Build flying machines as you explore Newton's laws of motion. (Children entering grades 1-4)

SCIENCE IN MOTION (SIM)

Learn the science of engineering as we discover what machines and nature have in common. Build structures, discover how animals move, and use simple machines as you run a crazy obstacle course. (Children entering grades 1-4)

DETECTIVE ACADEMY (DA)

Step into the shoes of a detective as you explore the tools detectives use to uncover crimes! Learn about spy equipment and discover the technological tools of detection. (Children entering grades 2-6)

FORENSIC SCIENCE (FS)

Focus on the science of forensics in this hands-on look at crime scenes! Collect evidence, recreate a crime scene, and identify suspects as you learn the science of sleuthing. (Children entering grades 2-6)

CRAZY CHEMWORKS (CCW)

Get your goggles ready to handle real lab equipment and experiment with chemical changes. Explore the microscopic world of molecules as we discover states of matter! (Children entering grades 2-6)

BRIXOLOGY (BRIX)

Using LEGO® bricks children will build different engineering-themed projects every day. They will explore the mechanical, structural, aerospace, nautical, and bioengineering fields, and participate in collaborative engineering challenges to solve real world problems. Each day they will take home an educational toy to reinforce each concept. (Children entering grades 2-6)

JUNIOR ROBOTICS (JR)

This introduction to robotics explores basic circuitry, mechanical science, and robot building. Each camper works daily on a robot to bring home at the end of the week! (Children entering grades K-3)

ROBOT ENGINEERS (RE)

Discover the science of robots! Learn how different robots work and use their components to explore what is around them. Use your engineering skills to build a working robot to take home! (Children entering grades 3-6)

ROBOTS & REACTIONS (R&R)

Work with robots and create chemical reactions as we uncover the nuts and bolts of the universe. Each camper builds a working robot to take home! (Children entering grades 2-5)

ADVANCED ROBOTICS (AR)

Learn about how different robots operate. Put your robotic knowledge to the test! Use your skills to build your very own Robotic Arm to take home! (Children entering grades 3-6)
