

JOIN US FOR AN INTERACTIVE MATHEMATICS WORKSHOP FOR PARENTS

For this school year, CSH students in all Math classes have been given free online access to a wonderful interactive database program called [MATHRIGHTNOW.COM](https://www.mathrightnow.com)

This program contains thousands of questions from topics in algebra, geometry, trigonometry, and statistics. Students practice their skills and can choose from a number of difficulty levels. All solutions are displayed as an audio/video production in real time and are carefully explained by math teachers.

The founder of Mathrightnow.com, Mr. Claude Szajna has allowed our school to utilize this program at no charge. He is offering a workshop to parents who would like to learn more about this learning tool on Tuesday November 2nd from 7:00-8:30 p.m. in the Computer Lab in room H-22.

Seating is limited to 28 participants, so you must call to reserve a spot. Please leave a message with Ms. Joanne Bradley, Principals secretary to secure a seat at 631-367-6831 and leave a contact number so we may confirm your reservation.
