JUNIOR DEVELOPMENT

The 10 and under tennis program focuses on making the sport of tennis fun. The equipment, rules and court sizes are just right for children at different levels of development. The balls bounce lower, don't move as fast through the air and are easier to hit. Racquets are sized for smaller hands and courts are smaller and easier to cover. By using this format, the benefits are immediate and within a short time kids are rallying and excited to keep playing.

The 11 and up program will focus on the fundamentals of stroke production and consistency. Players will learn the correct mechanics of each stroke, proper court position, movement and sound strategies for future growth and development. These basic techniques will be reinforced constantly through fun games, singles and doubles play, coordination exercises and team competitions.

THURSDAY, FEBRUARY 23 "I can't Believe my Eyes!" 9:00-12:00, Conklin Barn, 2 High Street

Was there life before TV? What did kids do for fun without video games? Find out what "moving pictures" used to mean; we will build early optical illusion toys, such as Bird in a Cage and a Zoetrope. Kids will also get to experience an original stereograms, and a Magic Lantern Show!

The Earth Day Competition is for school children in grades K-6 from every corner of New York State. The Senate's goal is to encourage children to develop an awareness of the environment and its resources. Teaching children about the importance of recycling and waste reduction is critical as we face the environmental challenges of the 21st Century.

OUR THEME: REDUCE, REUSE, RECYCLE

The Senate's focus is to emphasize the importance of recycling and waste reduction, to encourage the exchange of ideas about recycling and waste reduction among schools, children and adults and to stimulate creative thinking about solutions to problems concerning recycling and waste reduction. We are asking students to create a poster that could be used as part of this campaign.
