Captivating Carbon Dioxide!

9:00 – 11:00AM (optional video 10:30 – 11:00AM)

West Side and Lloyd Harbor 2nd, 3rd and 4th graders, with chaperone

From fermentation to photosynthesis, CO₂ is a great chemical to encourage people to think like scientists and better understand the world around us. While this simple chemical compound is something you know by name, you probably haven't thought much about its role in evolution or how it can change our future. CO₂ levels affect human health, how plants function, and the overall biodiversity on Earth. Other planets have carbon as well. Did you know there is a lake of frozen CO₂ (dry ice) on Mars?! Come join us as we learn about the role of CO₂ and how to have fun with it.

In this lab students will:

- observe several CO₂ reactions;
- experiment with dry ice;
- discover the role of CO₂ in your life through simple experiments.

Chaperones fully participate in all program activities. Sessions are \$20.00 per person (\$40.00 for a participating student and accompanying chaperone.)

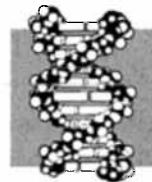

What you need to do:

- Reserve your space by completing and returning the reservation form **by February 23rd** with your payment to either:
