

6/14/2021

Good Morning and Welcome to Tech tip Monday for 6/14/2021 - Slides Show assistants and links to year end live-streams and videos.

Over the weekend a new add-on was added to Google Slides, "Photos to Slides". Photos to slides allows users to import pictures from Google Photo Albums into Google Slides. The add-on is very easy to use. Below are two short videos on how to use this tool. The free version allows for up to 50 photos to be imported at time. Please note that users can conduct multiple uploads into a presentation to create presentations over 50 slides long.
